

T.D. N° 09 DE CHIMIE

EXERCICE N° 01 :

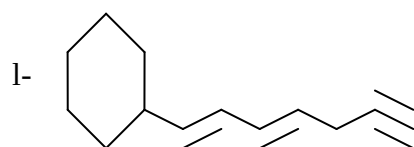

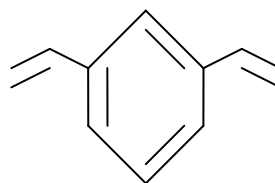

Nommer les composés suivant, selon les règles de l' I.U.P.A.C.

i-

k-

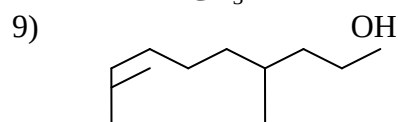

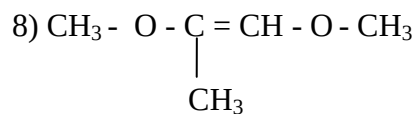

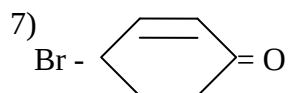

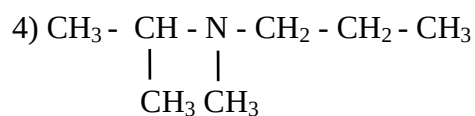

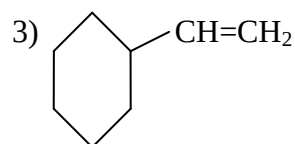

EXERCICE N° 02 :

Donner les formules semi-développées des composés suivants :

- a- 4-éthyl-2,2,6-triméthyl octane.
- b- 2,6-diméthyl-6-éthyl-4-(1'-méthylpropyl) nonane.
- c- Hept-2-én-5-yne.
- d- 5-éthynyl cyclohexa-1,3-diène.
- e- O- éthyl terBu benzène.

EXERCICE N° 03:

Etablir les noms des composés suivants :

EXERCICE N° 04 :

Les noms suivants, même s'ils décrivent sans ambiguïté une structure, ne sont pas corrects au regard des règles de la nomenclature. Quel serait le nom correct ?

- | | |
|---------------------------------------|---|
| 1) 3-propylnonane | 9) 2,2-diméthylbutanone |
| 2) 2-fluoro-3-oxobutane | 10) 3-oxocyclohexylamine |
| 3) 1,1,2,2-tétraméthyléthane-1,2-diol | 11) 2-éthylpropène |
| 4) 1-cyanobut-3-én-2-one | 12) 1,2,4,5,6-pentaméthyl-octane |
| 5) Diméthylacétylène | 13) Ethoxyméthane |
| 6) 1,1,4-triméthylbutane | 14) N-méthyl-N-butyléthylamine |
| 7) 2-éthylcyclohexène | 15) 3,7-dichloro-6-éthyl-4,4-diméthyl nonane. |
| 8) Cyclopent-1-én-3-ol | |
