Text :

Antimicrobial resistance (AMR) has emerged as a major global health concern. It occurs when microorganisms evolve mechanisms that protect them from the effects of antimicrobial drugs. The misuse and overuse of antibiotics accelerate this process, rendering standard treatments ineffective and increasing the risk of severe infections, prolonged hospital stays, and mortality.

Comprehension :

19- *What is the primary cause of antimicrobial resistance according to the text ?*

- a- Genetic mutations only.
- b- Misuse and overuse of antibiotics.
- c- Lack of hospital equipment.
- d- Poor patient compliance only.

20- *One consequence of antimicrobial resistance is :*

- a- Shorter hospital stays.
- b- Reduced mortality.
- c- Faster recovery.
- d- Ineffective standard treatments.

Good luck.
